

**SURFACE SUPPORT**

**SPIDER PLATE**

Surface control can be a critical component for effective roof and rib support systems.

Proper applications, with adequate stiffness characteristics, can help minimize or even eliminate progressive roof and rib failures.

While there is not a universal method that can be applied for roof and rib stabilization, field trials have proven that a combination of a bolt and the Minova Spider Plate was effective in reducing rock spalling and skin failures.

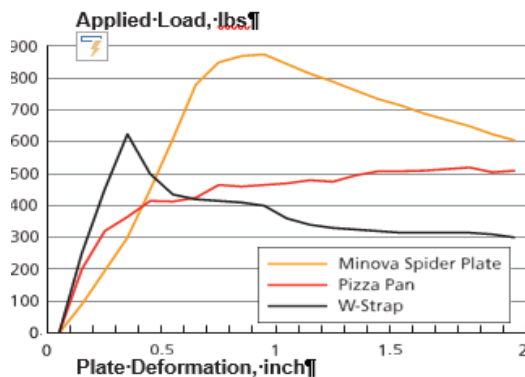

The Spider Plate is available with your choice of edges:

- Standard, flat edge
- Curled edge, for additional safety

**SPECIFICATIONS**

Size	Grade
17" X 17"	Spider I
17" X 17"	Spider II

**APPROVALS AND CERTIFICATES**

an ISO 9001:2015  
Quality Management System Certified Company.
